**Figure 2 All items Index**

**(2) Sub-indices for 10 major groups in 2025**

Regarding sub-indices for 10 major groups, “Food” rose 6.8%, mainly due to a rise in “Food, less fresh food”. “Transportation & communication” rose 2.7%, mainly due to a rise in “Private transportation”. “Fuel, light & water charges” rose 3.6%, mainly due to a rise in “Electricity”. “Culture & recreation” rose 2.4%, mainly due to a rise in “Recreational services”. “Housing” rose 1.0%, mainly due to a rise in “Repairs & maintenance”. “Furniture & household utensils” rose 2.7%, mainly due to a rise in “Domestic non-durable goods”. “Clothes & footwear” rose 2.6%, mainly due to a rise in “Clothes”. “Medical care” rose 1.5%, mainly due to a rise in “Medicines & health fortification”. “Miscellaneous” rose 1.1%, mainly due to a rise in “Personal care services”.

On the other hand, “Education” fell 4.5%, mainly due to a fall in “School fees”. (Table 2)

**Table 2 Changes from the Previous Year and the Degree of Contributions by 10 Major Groups**

	All items	Food	Housing	Fuel, light & water charges	Furniture & household utensils	Clothes & footwear	Medical care	Transportation & communication	Education	Culture & recreation	Miscellaneous
Change from the previous year (%)	3.2	6.8	1.0	3.6	2.7	2.6	1.5	2.7	-4.5	2.4	1.1
Contribution to annual change		1.94	0.19	0.26	0.11	0.09	0.07	0.36	-0.13	0.23	0.06

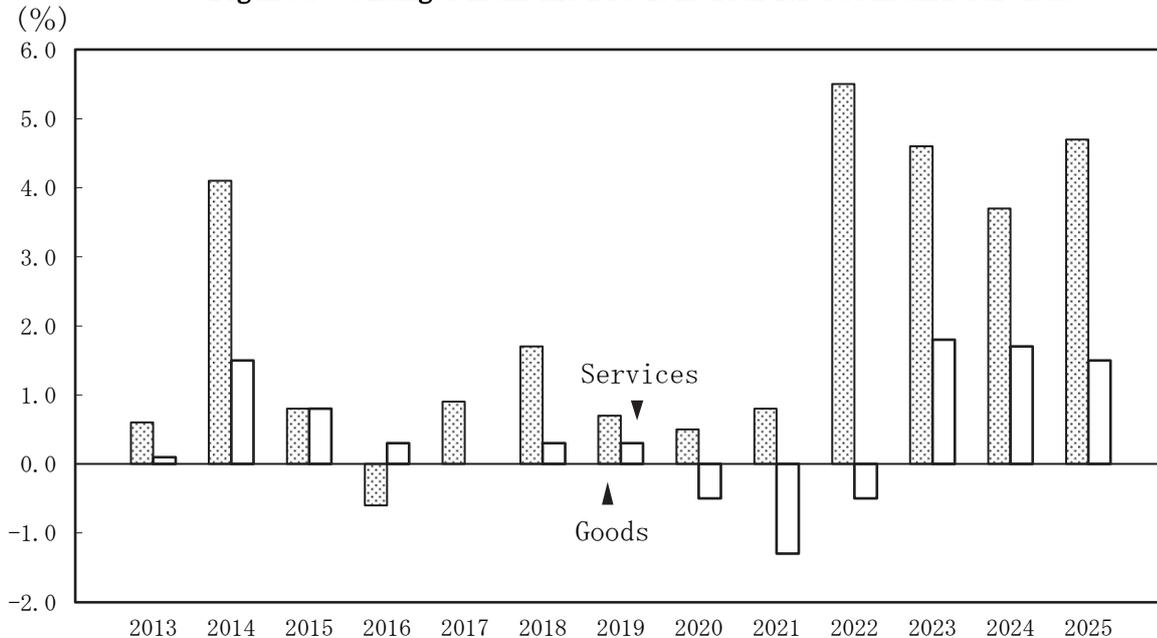

Note: Each contribution is relative to change from the previous year in the “All item” index.

### (3) Sub-indices by goods and services classification in 2025

Goods index rose 4.7% from the previous year for nine years in a row, mainly due to a rise in “Food products” which contains “Chocolate”.

Services index rose 1.5% from the previous year for three years in a row, mainly due to a rise in “Services related to communication, culture & recreation” which contains “Telephone charges (mobile phone)”. (Figure 3)

**Figure 3 Changes from the Previous Year for Goods and Services**

#### (Reference) The all items index in recent years

- In 2021, the index fell 0.2%. This was mainly because “Telephone charges (mobile phone)” fell due to new low-priced charge plans for smartphones started to be provided by each of major cell phone companies, “Gasoline” and “Kerosene” rose due to high crude oil prices, and “Hotel charges” index rose due to a retroaction to Go To Travel campaign conducted in 2020.
- In 2022, the index rose 2.5%. This was mainly because “Energy” and “Food, less fresh food” rose on the back of higher international raw material prices, higher crude oil prices by the situation in Ukraine and weak yen. On the other hand, “Hotel charges” fell due to the Nationwide Travel Support program.
- In 2023, the index rose 3.2%. This was mainly because “Food, less fresh food” rose on the back of higher raw material prices and transportation cost and “Services” rose on the back of higher raw material prices and recovery of domestic demand. On the other hand, “Energy” fell due to the Subsidy program for Electricity and City gas charges.
- In 2024, the index rose 2.7%. This was mainly because “Rice” rose due to tightening supply-demand balance and rising production cost, “Food, less fresh food” including “Chocolate” rose on the back of higher raw material prices against the background unfavorable weather condition, and “Hotel charges” index rose due to increased travel demand from inbound tourists and others.
- In 2025, the index rose 3.2%. This was mainly because “Food, less fresh food” including “Chocolate” rose on the back of higher raw material prices. Especially, “Rice” rose due to tightening supply-demand balance, rising production cost and transportation expenses. On the other hand, “High school fees (public)” and “High school fees (private)” fell due to Temporary High School Tuition Support Fund.

**Note for the " Charges for package tours to overseas " index**

The " Charges for package tours to overseas " index faced difficulties in stable price collection due to the impact of the COVID-19 pandemic, which led to the cancellation of many tours. As a result, from the January 2021 results onwards, the index was supplemented by substituting the " Charges for package tours to overseas " index of the same month in 2020. Because stable price collection became possible again as foreign package tours gradually resumed and it was confirmed that the unique movements of the " Charges for package tours to overseas " index, such as price increases during the travel season, generally matched past trends even after the resumption of collection, the index was created using prices collected through web scraping as before from the January 2024 results onwards.

Therefore, the year-on-year comparison of the " Charges for package tours to overseas " index for 2024 includes changes during the supplementation period from 2021.
