Notes: 1. This table is a re-arrangement of the present Iron and Steel Monthly Report research classified by the processes of hot rolling, cold rolling and metal-coating into categories of complete steel products commonly used in business.

2. The re-arranged method is to add the following together: hot-rolled steel (excluding rounds for tubes, and steel strips with strip-width of 600 mm or more for cold-rolled electrical sheet and strips), cold-finished steel, coated steel (excluding cold-finished bars and wires), steel pipes and tubes, and cold-rolled steel shapes, and then, to adjust overlap of production, and subtract the amounts of consumption in each of the subsequent hot-rolled, cold-rolled and coated steel processes.
