1. Subject of the survey

The kinds of questionnaires and scope of the survey in this monthly report are as in the following table

| Kinds of questionnaires | Scope of the survey |
|--|--|
| Chemical Fertilizers, Lime and Industrial Sodium Chemicals | All business establishments. Lime, Precipitated calcium carbonate: business establishments with 15 or more employees |
| Coal Tar Products, Cyclic Chemicals and Synthetic Dyes | All business establishments |
| Industrial Organic Chemicals and Sensitive Materials for Photography | All business establishments |
| Petrochemical products | All business establishments |
| Industrial Inorganic Chemicals, Gunpowders | All business establishments |
| Catalyst | All business establishments |
| High Pressure Gas | All business establishments |
| Plastic(materials) | All business establishments |
| Oil and Fat Products, Soap, Synthetic Detergents, and Surface-active Agents | Business establishments with 10 or more employees |
| Cosmetics | Enterprises with 30 or more regular employees in all (including consigned companies) |
| Paints and Printing Inks | Business establishments with 10 or more employees |

2. The definition of survey items

(1) Product

① Production

The quantity of products actually produced (including produced as a consignee) by the establishment that is the object of the survey (hereafter, 'the survey object'). However, 'products in process' shall be excluded.

Besides, 'Production' includes products as process goods or for consumption for other products in 'the survey object'.

② Reception

The quantity of products received by the factories or warehouses of 'the survey object' that produces the same survey commodity items due to the following circumstances:

Purchase from other enterprises (including imports)

- a. Reception from other factories belonging to the same enterprise
- b. The commissioned products and commission-manufactured products received from the consignees (including subcontracted factories)
- c. Returned products

③ Consumption

The quantity of products consumed as materials, process goods and fuels in 'the survey object'.

④ Shipment

The quantity of products actually shipped from 'the survey object's' warehouse or rental warehouse which 'the survey object' mainly uses.

Besides, the quantity of products is distinguished as 'Sales' or 'Other' in the following ways:

(Sales)

- a. Products directly sold to distributors or other consumer enterprises
- b. Products shipped to the headquarters/sales offices or relay points for the purpose of selling
- c. Commissioned products shipped to consigners that are sales dealers (including consumers)
- d. Products shipped to other factories of the same enterprise which are not producing the same survey commodity

(Other)

- a. Products shipped to other factories of the same enterprise which are producing the same products as the survey commodity
- b. Products shipped to other factories of the same enterprise as materials
- c. Products shipped as materials for use in the commissioned products or commission-manufactured products
- d. The commissioned products or commission-manufactured products shipped to the manufacturers (consigners) that are producing the same survey commodity
- e. Products used in-house (equipment investment for an enterprise's own factory, use for samples, use for gifts, use in testing and research)

(Sales Value)

Value as evaluated by the contract price or producer's selling price.

In this case, 'contract price' or 'producer's selling price' are the enterprise's selling prices excluding shipping charges, transport costs, insurance costs and other costs, and including consumption tax.

⑤ Inventory at the end of month

The quantity of products produced or received by 'the survey object' which are actually stored in 'the survey object's' warehouses and rental warehouses which 'the survey object' mainly uses.

(2) Labor

Number of persons engaged at the end of month

The number of persons that actually and regularly engage in production, management or other operations (including the dispatched workers).

3. Others

(1) Abbreviations used in this monthly report are as follows:

| | | | | | |
|-----|-------------------------------|-----|------------|-------|---------|
| 「0」 | Less than unit after rounding | 「-」 | No results | 「...」 | Unknown |
| 「r」 | Revised | 「x」 | Conceal | 「▲」 | Minus |

(2) Figures may not exactly equal totals because of rounding.

(3) When reprinting the statistics contained in this monthly report in other printed matter, the fact that they are based on the Monthly Report of Chemical Industry Statistics (Ministry of Economy, Trade and Industry) must be clearly indicated.

(4) Because of the review of the scopes, there may be discontinuity for some consecutive data of the commodity. Please refer to 'Continuity Coefficients by Commodity' (page58) for details.

The calculation of the year-to-year percentage of the survey commodity is done using connecting coefficients.

注: (特掲)石油化学製品は※印業種に含まれている石油化学製品を特に指数化したものである。

中には純ベンゼンのように、非石油系の比率は非常に低いものの、石油系と非石油系の分割ができない品目も含まれている。

(note) An index number turned specially with the Petro-chemicals (the petrochemistry product contained in the * mark type of industry). We have the list of articles which the petroleum of the very low thing and non-petroleum can't be divided into contained by an inside in the ratio of the non-petroleum like pure benzene, too.

(注) (特掲) 石油化学製品は※印業種に含まれている石油化学製品を特に指数化したものである。

中には純ベンゼンのように、非石油系の比率は非常に低いものの、石油系と非石油系の分割ができない品目も含まれている。

(note) An index number turned specially with the Petro-chemicals (the petrochemistry product contained in the * mark type of industry). We have the list of articles which the petroleum of the very low thing and non-petroleum can't be divided into contained by an inside in the ratio of the non-petroleum like pure benzene, too.

*稼働率=月間生産量÷生産能力。ただし、能力がt/年の場合は月間能力を「年間生産能力÷12」として算出した。

Notes *Production capacity means capacity of present facilities under standard conditions (raw materials, power and labor).

*Rate of operation = monthly output / production capacity. However, in cases where capacity is t/Y, monthly capacity has been calculated according to the formula: yearly production capacity / 12.
