Notes1. The total net numerical value was also published in the lower line.

2. Coal includes the coal for making coke (material coal).

3. Coal coke includes pitch coke.

4. Because production or fuel occurring subsidiarily is included by consumption for raw materials, the total (crude petroleum equivalent) consumption repeats.

In addition, it is the net consumption that removed the thing that the numerical value of the lower berth (net) indication of the total column switches it from other fuel in subjects of survey establishment and used.
