Note1: Yearly and quarterly data of number of establishments, number of employees and sales floor area are calculated at the end of term.

Note2: Yearly and quarterly data of sales per employee and sales per floor area (㎡) are average of that term.

Note3: Growth rates of number of establishments that showed at "Percentage change from the same month/term of the previous year after number of establishments have been adjusted" column are calculated by figures that showed "sales value" column.

Note4: Sales per ㎡ are calculated excluding sales value of restaurant and café.

Note5: The percentage change from the same month/term of the previous year is calculated using the linked coefficient to adjust for discrepancies. Refer to the Appendix table.

Note1: Yearly and quarterly data of number of establishments, number of employees and sales floor area are calculated at the end of term.

Note2: Yearly and quarterly data of sales per employee and sales per floor area (㎡) are average of that term.

Note3: Growth rates of number of establishments that showed at "Percentage change from the same month/term of the previous year after number of establishments have been adjusted" column are calculated by figures that showed "sales value" column.

Note4: Sales per ㎡ are calculated excluding sales value of restaurant and café.

Note5: The percentage change from the same month/term of the previous year is calculated using the linked coefficient to adjust for discrepancies. Refer to the Appendix table.

- Blank cell means no linked coefficient.
