# Notes for Utilization

## 1. Statistical Materials

This yearbook contains 2019 survey results for the production of mineral resources and petroleum products, ceramics and building materials. Surveys were conducted under the METI's Regulations for the Current Survey of Production Statistics "Fundamental Statistics", in accordance with the Statistics Law.

The yearbook contains final figures that were revised after being published in the "Monthly Report of Current Production Statistics Survey".

## 2. Scope of Survey

For items included in this yearbook, the surveys cover the following establishments:

| Questionnaire name | Survey scope |
|---|---|
| ◆Mineral resources and Petroleum products statistics | |
| Metallic Minerals and Coke | All business establishments<br>excluding Limestone factories : business establishments with 10 or more persons engaged |
| Crude oil and natural gas | All business establishments |
| Petroleum Products | All business establishments |
| ◆Ceramics and Building materials statistics | |
| Flat glass, Safety glass, Multiple glass and Glass fiber products | All business establishments |

| Carbon products and Grinding wheels | All business establishments |
| Board and Panels | All business establishments |
| Metal building materials | Business establishments with 30 or more persons engaged |

## 3. Definitions of surveyed items

The definition of each item in the production statistics is as follows.

### (1) Product

① Production

The quantity of products actually produced "including produced as a consignee" by the establishment that is the object of the survey "hereafter, the survey object." However, "products in process" shall be excluded.

Besides, "Production" includes products as process goods or for consumption for other products in "the survey object."

② Reception

The quantity of products received by the factories or warehouses of "the survey object" that produces the same survey commodity items due to the following circumstances:

a. Purchase from other enterprises "including imports"

b. Reception from other factories belonging to the same enterprise

c. The commissioned products and commission-manufactured products received from the consignees "including subcontracted factories"

d. Returned products

③ Consumption

The quantity of products consumed as materials, process goods and fuels in "the survey object"

④ Shipments

The quantity of products actually shipped from “the survey object's” warehouse or rental warehouse which “the survey object” mainly uses

Besides, the quantity of products is distinguished as “Sales” or “Other” in the following ways:

(Sales)

a. Products directly sold to distributors or other consumer enterprises

b. Products shipped to the headquarters/sales offices or relay points for the purpose of selling

c. Commissioned products shipped to consigners that are sales dealers “including consumers”

d. Products shipped to other factories of the same enterprise which are not producing the same survey commodity

(Other)

a. Products shipped to other factories of the same enterprise which are producing the same products as the survey commodity

b. Products shipped to other factories of the same enterprise as materials

c. Products shipped as materials for use in the commissioned products or commission-manufactured products

d. The commissioned products or commission-manufactured products shipped to the manufacturers “consigners” that are producing the same survey commodity

e. Products used in-house “equipment investment for an enterprise's own factory, use for samples, use for gifts, use in testing and research”

f. Products consumed in-house “only in the case of the no consumption survey item”

(Sales Value)

Value as evaluated by the contract price or producer's selling price

In this case, “contract price” or “producer's selling price” are the enterprise's selling prices excluding shipping charges, transport costs, insurance costs and other costs, and including consumption tax.

⑤ Inventory at the end of the month

The quantity of products produced or received by “the survey object” which are actually stored in “the survey object's” warehouses and rental warehouses which “the survey object” mainly uses.

**(2) Production Capacity**

All facilities or production capacity under the survey actually owned by “the survey object”

**(3) Labor**

Number of persons engaged at the end of month

The number of employees that actually and regularly engage in production, management or other operations including the dispatched workers.

## 4. Others

(1) Figures are rounded down to the nearest survey unit, so there may be cases where the totals vs. breakdowns, or yearly totals vs. monthly totals, do not necessarily agree.

(2) Abbreviations used in this monthly report are as follows.

"－" means no results recorded

"0" means less than 1 unit after rounding

"…" means results are unknown or unsurveyed items

" r " means data is revised

" x " means data is confidential

"▲" indicates a negative number

(3) When reprinting the statistics contained in this report in other publications, please be sure to note that they are from the "2019 Yearbook of Current Production Statistics, Mineral resources and Petroleum products, Ceramics and Building materials (Ministry of Economy, Trade and Industry)".

(4) Continuity coefficients

Several goods cannot be compared before and after certain dates due to revisions of some surveyed items. For these goods, it is necessary to multiply the figures before the break date by the connecting coefficients, and then relate these figures to the figures after the break date. For details, please refer to page124.

(5) This yearbook is published separately from Current Survey of Petroleum Products, Supply and Demand, from 2013. Please refer to the Yearbook of Mineral Resources and Petroleum Products Statistics.
